

Labour Market Bulletin

Ontario

April 2017

This Labour Market Bulletin provides an analysis of Labour Force Survey results for the province of Ontario, including the regions of Hamilton–Niagara Peninsula, Kingston–Pembroke, Kitchener–Waterloo–Barrie, London, Muskoka–Kawartha, Northeast, Northwest, Ottawa, Stratford–Bruce Peninsula, Toronto and Windsor–Sarnia.

OVERVIEW

Labour Force Trends – Ontario employment holds steady in April

- The Ontario employment figure decreased slightly by 1,600 in April
- Losses in full-time employment (-13,800) more than offset gains in part-time employment (+12,300)
- The unemployment rate declined from 6.4% in March to 5.8% in April

In April, Ontario employment decreased slightly by 1,600. April saw part-time employment gains of 12,300 which were more than offset by losses in full-time employment (-13,800). Compared to March, the provincial unemployment rate dropped by 0.6 percentage points in April as unemployment decreased by 45,200. As the labour force shrank by 46,800, the participation rate declined from 64.9% in March to 64.5% in April, which could indicate that a number of unemployed job-seekers opted to leave the labour force.

In Canada, employment increased by a lacklustre 3,200 in April. While this was the fifth consecutive month of gains, it fell short of the expected employment increase of 10,000.¹ The gain came solely from an increase in part-time employment (+34,300) which more than offset a full-time employment decline (-31,200). National employment growth in April was driven primarily by gains in British Columbia, while Quebec and Saskatchewan experienced declines. The national unemployment rate declined from 6.7% in March to 6.5% in April. As in Ontario, national labour force (-45,500) and unemployment (-48,700) figures declined by similar amounts which implies a significant number of individuals exiting the labour force.

Additionally, there was concern over a very weak 0.7% year-over-year gain in average hourly wages. The Bank of Canada has used this to support a looser monetary policy stance as it implies that there is a fair amount of slack

¹ Trading Economics. (2017, May 5). [Canada Employment Change](http://www.tradingeconomics.com/canada/employment-change). Trading Economics. Retrieved from <http://www.tradingeconomics.com/canada/employment-change>

remaining in the economy. However, despite some of these more negative tones, strong business confidence as measured by the Ivey PMI, bodes well for the Canadian economy going forward.²

In the United States, total non-farm payroll employment increased by 211,000 in April, beating the expected 185,000 and recovering from a weak 79,000 employment increase in March.³ Employment increased in leisure and hospitality, health care and social assistance, and financial activities. The unemployment rate fell from 4.5% in March to 4.4% in April.⁴ Following a weak first quarter for the U.S. economy, where GDP growth was only 0.7%, this jobs report will provide some confidence to the U.S. Federal Reserve's assertion that the weak first quarter result was only transitory and that another interest-rate hike is expected in June. This continues to suggest a robust labour market and an optimistic economic outlook.⁵

Between April 2016 and April 2017, employment in Ontario increased by 86,600 (+1.2%), with the majority of the gains coming from full-time employment. On a year-over-year basis, the unemployment rate dropped by 1.1 percentage points to 5.8%, due to a decrease of 82,500 in unemployment. However, the participation rate also dropped by 0.8 percentage points to 64.5%, as the growth in population (+1.3%) continued to outpace the increase in the labour force (+0.1%).

The unemployment rate for youth aged 15 to 24 in Ontario declined by 2.6 percentage points to 12.2% in April but remained higher than the national youth unemployment rate of 11.7%. Ontario's youth participation rate declined by 0.7 percentage points and the employment rate remained unchanged. The youth labour force (-30,000) and unemployment (-31,000) both declined by similar amounts which again implies an exodus from the labour force. This could also imply that the driver of unemployed job-seekers leaving the labour force, provincially for all ages, was the youth segment.

EMPLOYMENT BY INDUSTRY

Goods-producing sector monthly employment down, but up year-over-year

Ontario's goods-producing sector employment in April was slightly lower; the seasonally adjusted figure was down 8,300 (0.6%) since March. Sector losses were highest in construction (-6,900) and manufacturing (-4,100), tempered by gains in forestry, fishing, mining, quarrying, oil and gas (+3,000).

The decline in **construction** was likely tied to slower non-residential activity. Although building permit values in Ontario fell in February on lower residential permits,⁶ housing starts in March were 5.0% higher.⁷ Residential

⁶ Statistics Canada. (2017, May 4). [CANSIM Table 026-0003, Building permits, values by activity sector, monthly \(dollars\)](http://www5.statcan.gc.ca/cansim/a26?id=0260003). Statistics Canada. Retrieved from <http://www5.statcan.gc.ca/cansim/a26?id=0260003>

⁷ Canada Mortgage and Housing Corporation. (2017, May 4). [CANSIM Table 027-0054, Canada Mortgage and Housing Corporation, housing starts all areas](http://www5.statcan.gc.ca/cansim/a26?id=0270054). Statistics Canada. Retrieved from <http://www5.statcan.gc.ca/cansim/a26?id=0270054>

intentions are also still higher than a year ago. CentreCourt Developments, for example, plans to start work on the 55-storey Transit City Condos tower in Vaughan this year.⁸ Future commercial projects announced in April include Loblaw Companies Limited's \$1.3B plan to open 30 new stores and renovate over 500 others⁹ and Bay Park Centre, a joint Ivanhoé Cambridge and Hines Interests LP commercial tower development in downtown Toronto.¹⁰ Several large infrastructure projects are also in the works, as the Government of Canada announced over \$1.8B for four GO Transit projects in the Greater Golden Horseshoe¹¹ and awarded contracts for restorations and repairs along the Trent-Severn Waterway totalling \$330M.¹² A separate \$330M upgrade of the Woodward Avenue Wastewater Treatment Plant in Hamilton is also set to start in June and to employ 300 workers at its peak.¹³

While some **manufacturing** layoffs were announced,^{14,15} the industry signalled a more positive outlook overall in April. Canadian manufacturer optimism increased to its highest level in the last six years, according to the IHS Markit survey of purchasing managers. A strengthening energy sector, higher domestic sales, and growth in US demand stimulated domestic manufacturing output.¹⁶ Amid the positive industry news in April, engineered wood products maker Phoenix Building Components Inc. will begin production and rehire 60 employees of the previous Kent Trusses plant in Sundridge,¹⁷ building membrane manufacturer Soprema will set up a new facility in Woodstock,¹⁸ and numerous craft breweries are opening and expanding.^{19,20,21,22} In Ontario's key auto sector,

stronger Canadian production, domestic sales, and exports to the US buoyed manufacturers.²³ Parts maker Mitsui High-tec, Inc. opened a new facility in Brantford and Titan Trailers Inc. is investing \$35M to increase capacity and employment at its Courtland plant; from 200 to 300 full-time workers.²⁴

News of employment gains in resource extraction in April was dimmed by the announcement of retroactive tariffs on Canadian lumber exports to the US of between 3 and 24%. Though there are signs the duty hike was anticipated by some producers, its employment impacts on **forestry** in Ontario and on **wood product** and **pulp and paper** manufacturing are yet unknown.²⁵ Further duties on Canadian lumber exports are expected to be announced in June as part of anti-dumping measures by the US.

Year-over-year employment in the goods-producing sector grew in April, adding 86,600 (+1.2%) positions compared to 12 months earlier. Twelve-month gains within sector industries were led by construction (+19,300) and manufacturing (+11,800) and losses were highest in agriculture (-11,600).

Services-producing sector employment held steady with gains offsetting losses

Changes in services-producing industries left the sector little changed between April and March (+6,700). Gains were led by professional, scientific and technical services (+12,200), transportation and warehousing (+11,600), and educational services (+11,300). The largest losses occurred in accommodation and food services (-15,100) and information, culture, and recreation (-9,800).

Also posting employment declines, **finance, insurance, real estate and leasing** shed some 6,800 positions in April, among mixed industry news. Layoffs of 1,500 at the Great-West Life Assurance Company across Canada will include 430 at its London Life Insurance Company subsidiary in London over the next two years.²⁶ On the bright side, however, health insurer League Inc. plans to expand and hire over 100 workers in Toronto²⁷ and online heavy equipment rental service Dozr intends to hire around 50 in Kitchener.²⁸

Since April 2016, services-producing employment added 72,500 (+1.3%). Industry gains were led by health care and social assistance (+26,900) and public administration (+24,800) and losses were only marked in accommodation and food services (-14,300) and information, culture and recreation (-8,000).

REGIONAL ANALYSIS

Employment in Toronto led employment growth in April 2017

The **Toronto** economic region produced the highest gains in employment between April 2016 and April 2017, boasting an increase of 39,200. As a result, unemployment fell by 0.5% as advances were made in both full-time and part-time work. Positive developments came from the regional retail trade sector as several retailers opened throughout the region including a Whole Foods location in the Leaside community,²⁹ the first Canadian location for apparel and lifestyle brands retailer, Footaction, in the Eaton Centre,³⁰ and a Sleep Country Canada store in Bolton.³¹ Going forward, Breitling, a Swiss watch manufacturer, will open a location,³² Samsung Electronics Can-

ada Inc. will open a 21,000-sq.-ft. flagship store,³³ and RYU Apparel, a fitness apparel brand, will open a new location,³⁴ all over the course of the next few months. However, recent news that clothing retailer, Express Inc., with most of its locations in the Toronto economic region, is set to shutter all of its brick and mortar locations across the country by the end of the month,³⁵ could adversely affect employment in the region.

The **Hamilton–Niagara Peninsula** economic region also recorded an increase in employment of 20,900 between April 2016 and April 2017. The unemployment rate dropped by half a percentage point over the period, as more people found employment in both full-time and part-time work. A small boost to the manufacturing sector came this month as Mitsui High-tec, Inc. opened a Brantford facility and hired 31 local employees. There are also plans to double this number over the next few years.³⁶ Furthermore, the real estate and rental and leasing industry is set to increase its presence in the community as Ryder Material Handling ULC will open a new sales and service centre in Brantford in July.³⁷ One of the four projects slated for the Government of Canada's investment in GO Transit is in Hamilton,¹¹ supporting employment in one of the region's largest industries: construction.

The **Muskoka–Kawartha**s economic region also produced strong gains in employment of 16,300, a 10.7% increase over the year. Advances were made as more individuals joined the labour force, increasing the participation rate by 5.2 percentage points. Positive news in the construction industry included the Government of Canada's investment in Trent-Severn Waterway structure upgrades¹² slated to start in 2018 and to be completed in 2020. Furthermore, construction is underway on a \$9.3M, Hampton by Hilton hotel in Belleville,³⁸ and the City of Pembroke has awarded the Indian River Bridge Rehabilitation contract to Willis Kerr Contracting Ltd., with the expectation that the work will be completed this summer.³⁹

The **Ottawa** economic region also profited in employment by 11,000, and decreased the unemployment rate by 1.6 percentage points over the term. Most of the increase was in part-time work which may be driven by trends in retail trade employment across the province. As such, David's Tea Inc. opened a location in Cornwall,⁴⁰ a new Sobeys opened in Orléans,⁴¹ and news that Ollie Quinn, a UK-based eyewear retailer, will open a boutique in Ottawa on Richmond Road⁴² could help push regional industry growth forward.

Employment also increased in the **London, Kingston–Pembroke, Northwest, and Stratford–Bruce Peninsula** economic regions.

Employment decreased in three economic regions over the term

The largest drop in employment (-5,900) occurred in the **Northeast** economic region between April 2016 and April 2017. Losses in employment were represented in both full-time and part-time work. However the unemployment rate dipped by 0.6 percentage points as more people left the labour force. As ongoing changes in the finance and insurance industry continue, RBC will close its Dubreuilville branch in October,⁴³ not helping the region's employment scenario. Going forward, the Northeast may see some positive growth in the manufacturing sector as Phoenix Building Components Inc., an engineered wood building products manufacturer, purchased the former Kent Trusses Ltd. plant,¹⁷ and Crosscut Distillery in Greater Sudbury will open by the end of the summer, complete with a tasting room and retail area.⁴⁴ Furthermore, the construction industry might get a boost in the region as the Municipality of Central Manitoulin awarded an \$858K tender to Sheppard Custom Building to construct a fire hall in Mindemoya, set to be complete by the fall.⁴⁵

Windsor–Sarnia also posted an employment decrease of -3,600, a 1.2% drop between April 2016 and April 2017. However, losses were entirely in part-time work. A decrease in the unemployment rate of 0.6 percentage points was reported, most likely due to the dip in the labour force and participation rate over the same period. Several upcoming construction projects,^{46,47,48} and developments in the manufacturing sector^{49,20} could help bolster employment in the economic region in future months.

The **Kitchener–Waterloo–Barrie** economic region also saw an employment loss of -1,800 between April 2016 and April 2017. The losses were seen entirely in part-time work as they more than offset gains in full-time work. Yet, the unemployment rate dropped by 0.3 percentage points, most likely as folks left the labour force. Damaging news in the manufacturing sector came from a layoff at Decast Ltd.¹⁴ However, job creation in the region's largest industry will likely pick up going forward as a new Frito Lay Canada warehouse in Cambridge⁵⁰ is completed and Linear Transfer Automation Inc. expands in Barrie.⁵¹
